6th Danube Conference on Epigenetics

27/10/2026

We attended the 6th Danube Conference on Epigenetics!

From 19 to 22 October, part of the group travelled to Budapest to attend the 6th Danube Conference on Epigenetics. It was an intense few days, packed with interesting talks and discussions with researchers from different countries. María also presented a poster, which sparked interest and led to some very useful discussions. We were able to enjoy Budapest, a beautiful city, and we've returned with new ideas and a real enthusiasm to carry on with our work.
