Science Week in Andalusia 2025

11/11/2025

During Science Week, held from 4 to 11 November 2025, we took part in a science outreach event aimed at pupils from various secondary schools in Granada, covering both lower secondary (ESO) and upper secondary (Bachillerato) levels. The event took place at the Department of Biochemistry and Molecular Biology I, Faculty of Sciences, University of Granada.

Throughout the week, the students had the opportunity to attend interactive workshops, where they were able to learn, in a practical and dynamic way, various scientific concepts relating to reproduction and other areas of interest within molecular biology.

We would like to thank all the pupils and teachers for their participation.
