Permanent Science Classroom

09/05/2025

On 9 May, we took part in an event at the Aula Permanente of the Faculty of Sciences at the University of Granada, as part of the STEAM project. The event consisted of a day of science outreach aimed at Year 9 pupils from IES Fernando III El Santo, who visited the Department of Biochemistry and Molecular Biology I. There, they took part in various interactive workshops that enabled them to learn, in a practical and engaging way, about different aspects of reproduction.

Thank you to the pupils for their enthusiasm and curiosity.
