The Repro-UGR group is taking part in the 40th ESHRE Annual Congress!

11/07/2024

From 7 to 10 July, Amsterdam hosted the 40th ESHRE Annual Congress, an event in which we had the privilege of participating by presenting two posters and an oral presentation.

We are very proud of our team’s work and of the opportunity to share our findings with leading specialists in the field of reproduction. The congress was not only an enriching forum for the exchange of knowledge and scientific debate, but also an excellent opportunity to forge new professional connections.

Furthermore, we had the chance to enjoy the vibrant city of Amsterdam. We returned from this experience with renewed energy and even greater motivation to continue advancing our research into reproductive health.
