2nd Andalusian Bioinformatics Conference

01/07/2024

From 24 to 26 June, Laura Antequera Pérez and Eduardo Salas Espejo took part in the 2nd Andalusian Bioinformatics Conference in Granada.

Both were selected to present posters: Laura's was entitled 'Exploring the Microbiome in Female Infertility', and Eduardo's was entitled 'Comprehensive analysis of active seminal microbiota and its relationship with semen quality parameters'.

During the conference, a wide range of topics were discussed and highlighted, with a view to fostering interaction within the growing bioinformatics community in Andalusia.

We hope to take part again and that such conferences, which facilitate the communication so essential to the development of a multidisciplinary science, will continue to be organised!
