Inma Pérez receives the ESHRE ‘Basic Science Award for Oral Presentation’

30/06/2023

Inma Pérez received the prestigious Basic Science Award for her outstanding oral presentation at the recent ESHRE Annual Congress, held in Copenhagen. Having the opportunity to present a paper as an oral presentation is in itself a great privilege, given that only 5 per cent of the proposed papers are selected.

Her presentation, entitled “Gut microbiome in endometriosis: a cohort study on 1,000 individuals”, captivated the audience and presented pioneering findings that will contribute to the study of endometriosis and its relationship with the gut microbiome.

This achievement reflects the Repro-UGR group’s commitment to advancing research into endometriosis and is an example of the impact our efforts can have on reproductive health.

Congratulations to Inma and the whole Repro-UGR team!
