The Repro-UGR group is taking part in the 39th ESHRE Annual Congress!

29/06/2023

The 39th ESHRE Annual Congress took place in Copenhagen from 25 to 28 June. We had the opportunity to take part in this congress by presenting two posters and one oral presentation.

We are very proud of our team’s achievements and of the opportunity to share our research findings with experts in the field of reproduction. The congress also provided an ideal platform for scientific discussions, the exchange of knowledge and networking opportunities.

Having returned from this experience, we are more motivated than ever to continue our research into reproductive health!
