Fertility Advances meeting. Embryo implantation: present and future

11/10/2021

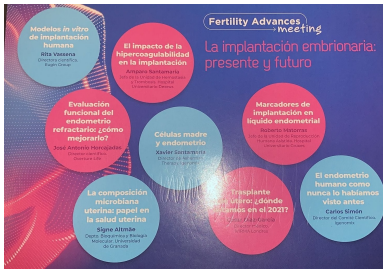

On 1 October, Dr Signe Altmäe attended the Fertility Advances Meeting on 'Embryo implantation: present and future', organised by #IBSA and held in Madrid.

At this meeting, various experts spoke about the latest advances and cutting-edge techniques for improving embryo implantation rates.

Specifically, Signe discussed the current state of research into the microbiota in human reproduction, and in particular how the microorganisms living in the endometrium may (or may not) affect fertility.
